

# **CLEAN BENCH**

## **ABSTRACT OF THE INVENTION**

5 A clean bench providing a working space for technicians, in a clean  
room, to remove and trap particles from the surface of an object with  
a high-pressure spray gun or a vacuum suction unit. This clean  
bench has an isolated disposal working space to avoid the escape of  
particles from it; moreover, it conducts and traps them by the design  
10 of a particle-conducting basin and a fan-filter unit (FFU) in it.
